

# Cybersecurity that fuels success

## COALFIRE AT A GLANCE

### Deep experience

- Nearly 20 years in the cybersecurity business
- More than 1,800 government and commercial clients
- Strong partnerships with leading service providers, including Amazon Web Services, Microsoft®, VMware, and Splunk

### Comprehensive approach

- A broad portfolio of cybersecurity solutions
- One of the largest, most advanced technical testing and simulation teams

### Tech-enabled approach

- Cloud-based CoalfireOne<sup>SM</sup> enterprise risk and compliance platform, used by more than 1,500 clients

### Industry- and client-focused innovators

- 97% client retention year after year
- 12 locations with more than 600 employees
- More than 40 industry certifications and affiliations
- Best practices gleaned from deep public sector experience, including work with the Department of Defense

## Services that span the cybersecurity lifecycle

Using a combination of advisory, compliance, technical testing, and engineering services, Coalfire looks at all aspects of our clients' environments. With a complete picture of possible vulnerabilities and threats, clients can make informed decisions and take appropriate steps to reduce their organizations' cyber risk and achieve greater success.

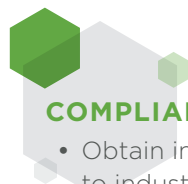

### CYBER RISK ADVISORY SERVICES

- Identify areas and scope of business risks.
- Build a remediation plan through best practices.
- Reduce risk of noncompliance, business disruption, lost IP, and damaged reputations.
- Implement policy development, business continuity, incident response, vendor management, etc.

#### Services

Strategy and planning workshop	Incident response
Cyber risk assessment	Third-party risk support
M&A due diligence report	IT business continuity management
Cybersecurity program development	Cybersecurity program advisory

### COMPLIANCE SERVICES

- Obtain independent validation of IT controls to industry and government standards.
- Get an unbiased perspective into overall program effectiveness.
- Leverage compliance efforts as part of the roadmap to a more secure organization.
- Quickly, easily, and inexpensively confirm system protection with the CoalfireOne<sup>SM</sup> Scans platform.

#### Services

FedRAMP	GDPR
FISMA	HITRUST
NIST, DoD, and federal requirements	HIPAA and risk services
PCI DSS and ASV	ISO 27001 and other ISO services
PA-DSS	SOC and SSAE 18
P2PE	CSA STAR

### TECHNICAL TESTING (COALFIRE LABS)

- Simulate sophisticated real-world attacks.
- Hunt for and uncover hidden threats and risks.
- Understand the impact of potential threats.

#### Services

Enterprise penetration testing	Reverse engineering
Application penetration testing	Research and development
Red teaming	Forensics
Social engineering	PCI Forensic Investigators
Physical assessment	Vulnerability scanning

### CYBER ENGINEERING

- Effectively integrate security solutions.
- Optimize the overall security posture.
- Protect organizations from cyber threats.
- Realize the fastest path to a safe, compliant cloud.

#### Services

Architecture design	Deployment and optimization
Cloud security	Monitoring and analysis
Product validation	Vulnerability analysis
Configuration evaluation	

### COALFIREONE<sup>SM</sup> PLATFORM

- Get a single dashboard view of security controls, vulnerabilities, compliance, and risk ratings.
- Access self-assessment tools.
- Automate vulnerability scanning.

### Trusted insight for navigating this complex cyber world

We stay ahead of technologies and mandates that impact cybersecurity. Regulatory organizations and leading companies count on us to help them understand the security concerns associated with:

- Cloud and virtualization
- Mobile security
- Point-to-point encryption (P2PE)
- EMV (Europay, MasterCard, and Visa) and contactless payments

Close gaps, minimize risk, and successfully achieve objectives.
