

Virtual chief information security officer (vCISO)

Put Coalfire's industry knowledge and security expertise to work on your team

In today's uncertain times, the absence of an experienced CISO or security executive can significantly impact various areas of your business. However, recruiting and retaining a dedicated professional with the skills and leadership to implement a successful cybersecurity strategy is often expensive and cumbersome.

ARE vCISO SERVICES RIGHT FOR YOU?

- Is your staff overburdened or lacking experience with information security requirements?
- Do you need to accelerate implementation of information security best practices?
- Is your business required to meet regulatory requirements?
- Do your customers have expectations around information security?

COALFIRE'S vCISO PROGRAM

Our vCISO program empowers your organization to have a highly qualified and experienced security professional when and where needed. The Coalfire vCISO will fully understand business needs and strategy and will act as an extension of your team.

We offer a broad range of services to help you assess your exposure to cyber risk, implement security improvements, and validate that risks are adequately controlled:

- Requirements analysis
- Stakeholder alignment
- Strategy development
- Program development
- Governance structure development
- Policy development
- Project oversight

WHY CHOOSE COALFIRE

- For nearly 20 years, our team of skilled advisors has helped organizations define their needs and provide clear visibility of organizational risk posture.
- We draw upon vast compliance specialization to help remediate IT-specific compliance gaps and establish readiness to satisfy compliance obligations.
- Our credentialed and highly skilled experts are effective communicators who present our findings in business terms for truly actionable insights.

PROTECT YOUR ORGANIZATION'S VALUABLE INFORMATION.
