Industry- and client-focused innovators

- More than 90 industry certifications and affiliations
- First to market in cloud security engineering, privacy, and key compliance areas like PCI and CMMC
- More than 50 open source and purpose-built security tools created and shared

Security driving business success

Coalfire's service lines

Strategy, privacy, and risk

Through a proven, strategic approach, our experts identify risk, address gaps, and establish metrics to help you develop and mature a business-aligned cybersecurity program.

Cloud security services

From strategy and readiness assessments, to migration and ongoing optimization, we give you the power to capitalize on the full promise of the cloud.

Threat and vulnerability management

By identifying and managing vulnerabilities through a programmatic approach, we drive improvements in your security posture and risk decisions.

Secure product development

Our holistic approach to testing and development facilitates faster time to market and improves the security of your products and applications.

Cybersecurity compliance and assessments

Through services that mitigate risk, reduce audit fatigue, and improve security, we help you build a sustainable program that speeds time to compliance so you can access new markets faster.

Managed services

To achieve a stronger security and compliance posture, place the operational burden of supporting your cybersecurity infrastructure on our cloud security experts.
