

Coalfire Hosts Students from University of Washington Business School

Westminster, CO – August 23, 2019 – [Coalfire](#), a provider of cybersecurity advisory and assessment services, announced that the company recently hosted 25 students and four faculty members from the University of Washington Foster Business School’s MS in Information Systems program for a day of learning, engagement, and cybersecurity education.

On August 16th, Coalfire leadership provided the students and faculty with an overview of cybersecurity and how Coalfire enables stronger organizational security posture. Following the presentation, the students engaged with a panel of Coalfire personnel from several different practice areas to talk about their experiences with Coalfire. A meet and greet lunch was then held for students to engage with Coalfire team members and ask questions about their experiences in the industry.

The opportunity enabled students to get a feel for a “day in the life” of an employee at a cybersecurity company like Coalfire, further expand ties between Coalfire and the University of Washington and inspire increasing interest in careers in cybersecurity.

About Coalfire

Coalfire is the trusted cybersecurity advisor that helps private and public-sector organizations avert threats, close gaps and effectively manage risk. By providing independent and tailored advice, assessments, technical testing and cyber engineering services, we help clients develop scalable programs that improve their security posture, achieve their business objectives and fuel their continued success. Coalfire has been a cybersecurity thought leader for nearly 20 years and has offices throughout the United States and Europe.
